Natural Foods Market

Whey protein helps increase energy levels and maximize bone and heart health. It's also beneficial for those with a compromised immune system, anyone wanting to lose weight and/or build muscle or for those simply needing a nutritional boost.

Whey Factors Protein Concentrate is easily digested with the highest absorbability rating of any type of protein (twice that of rice protein and two and one-half times that of pea protein). Studies show it raises levels of glutathione, a powerful antioxidant known to enhance immunity and liver function by stimulating antibody production.

Sweetened only with stevia, a calorie-free natural sweetener, **Whey Factors Protein Concentrate** provides long-term energy, effective weight loss and recovery support for those who are ill or injured. Available in vanilla, chocolate or unflavored, it mixes easily, has a smooth texture and tastes great.

As always, we guarantee your satisfaction.
